A great deal of thought, time and energy has been put into the Amateur Radio Band Plan published by the ARRL.

Recognizing this fact, this Band Plan utilizes the standards set forth by the ARRL with specific attention being paid to the calling frequencies that will be used by "Monkeys" in an emergency. As such it does not include all frequencies available to licensed Amateur Radio operators and is intended only as a guideline to facilitate communication between "Monkeys".

It is expected that users of this band plan will operate within the scope of their license and use good Amateur practices whenever and wherever possible.
